Peter L. Mansmann, Esq. of Precise, Inc.

As CEO, Peter Mansmann, Esq. founded Precise, Inc. in 2000 and spent his formative years as a trial consultant, developing and refining the company's suite of litigation support services. After quickly recognizing the growing scope and importance of electronic discovery to the legal community, Pete established Precise's eDiscovery division to provide sound legal and technical resources to clients whose cases involved large volumes of electronically stored information (ESI).

A collaborative approach to project risk management.

- Contract Development
- Project Controls
- Internal Document Management
- Web-based External Collaboration

Why PRM team?

We observe.

We see the challenges our clients in the architecture, engineering and construction industry face.

We know.

Our combined experience has shown us that anticipating and mitigating risk exposure proactively reduces costs, increases efficiency and sets up a project for success.

We deliver.

We'll work with you and your project team so you will benefit from our expertise and innovation in contract development, project controls, internal document management and Web-based external collaboration.

Benefit from our advice.

As a group of architecture, engineering and construction project experts, we'll help your project team build a foundation for success—from contracts through closeout.

Contract Development

- Assess and analyze risk
- Mitigate exposure proactively
- Draft and negotiate contracts
- Implement policies and procedures
- Create a contract user's guide
- Consult with a Project Advocate
- Protect stakeholder interests

Internal Document Management

- Capture your organization's data
- Filter and de-duplicate internal data based on custom requirements
- Review electronic information
- Undergo on-site collection of Electronically Stored Information (ESI)

Project Controls

- Forecast project developments
- Develop comprehensive and coordinated review-and-approval processes
- Collect and review project data
- Maintain accurate and up-to-date project information

Web-based External Collaboration

- Connect all project participants online
- Streamline reviews-and-approvals
- Share project data securely
- Protect private information
- Audit and archive automatically
- Rely on smooth interoperability
