

Are Your Projects Costing You Money?

PRM WealthCheck: Maximize Your Wealth!

Running a successful company requires staying on top of Best Practices. Better efficiency means better profits. You know there are areas in your organization that could benefit from better processes and tools, but what fits best for your company?

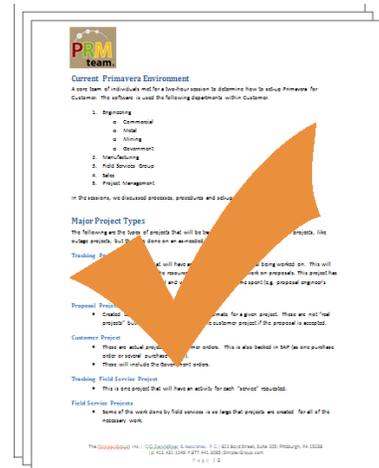

PRM WealthCheck is like a physical exam for your organization. It identifies the pain points that exist in any organization and makes recommendations on how to address them. Sometimes this entails utilizing the correct software platform and sometimes it entails focusing on processes and procedures. You may not know the right questions to ask, but we do. And we have the answers.

How WealthCheck Works:

PRM Team is a group of subject-matter experts, and WealthCheck is our way of identifying opportunities to improve your company’s performance—at no cost to you.

Unlike other consultants who use a one-size-fits-all approach, we'll take the time to meet with your core team to pinpoint your unique challenges. Then we'll suggest a

“We want to increase profits on our projects, but we don’t know where to start.”

customized plan to implement the changes that will allow you to maximize your efficiency.

The PRM WealthCheck Report

WealthCheck is a no-cost, two-hour experience that will uncover your problems and put you on the road to peak performance. When it's over, you'll receive a written report that details our findings and recommendations, including:

- ✔ An **Executive Summary** documenting our analysis of your current issues and challenges
- ✔ A **Document-Retention Report** listing recommendations for document-retention policies for your company and project documents in hard copy and electronic format
- ✔ A **Contract-Review Document** describing the contractual agreements in place for projects you are managing within your organization, outlining potential areas of risk and liability to investigate further
- ✔ A **Schedule & Cost Analysis Overview Report** documenting areas of concern on your current project schedule and cost reports, and including a set of improvements so that these management reports are *usable*— not just tracking historical information
- ✔ A **System Health Check Report** that identifies the current methods in place to manage your projects, and a list of recommendations to better organize, manage and track your project records including critical review-and-approval documents like RFIs, Submittals, Change Orders, and more.

There's no obligation to engage with us beyond WealthCheck.
